

Revolve[®] N-307

Revolve N-307 is a high density (0.939 g/cm³), low melt (3.5 g/10 min) hexene polyethylene grade for rotomoulding exclusively made in Germany for Matrix. We developed this grade as part of our *Designed for Roto[®]* programme to have a wide processing window, outstanding physical properties and consistent long-term performance. The grade is fully protected against thermal and light degradation: N-307 is UV10 stabilised.

N-307 when sold as granules is known as Revolve 5056 and black powder M-748.

The natural and black grades carry the following EU approvals:

German TÜV - diesel tanks

Swedish SPF - underground tanks

English WRAS - storage tanks for drinkable water

N-307 complies with the EN13341:2005 standard for above ground for domestic heating oil, kerosene and diesel.

N-307 complies with the Australian standards AS2070 and AS4020, and fulfils the requirements of the AS4766 for storage tanks for water and chemicals.
